Working at the diagnostic laboratory was a very integrative poultry experience. The diagnostic lab interfaces with a number of different poultry professionals and it is interesting to see how things work from the laboratory perspective.

The Eskelund Scholarship is an opportunity to help me offset my expenses as I trek across the USA learning as much as I can prior to graduation.

While I learned a good deal at those places, much of my time had to be spent earning my pay. With the help of the AAAP preceptorship scholarship this past year I was able to go places without the burden of money and focus solely on learning.
