In their written evaluation, the American Veterinary Medical Association Committee on Veterinary Technician Education and Activities listed the following strengths for the MSU College of Veterinary Medicine’s Veterinary Technology Program:

- Enthusiastic and motivated program director who is very organized and knowledgeable, has excellent management skills, and is concerned for student success.
- Very thorough and well-written self-study.
- An innovative, dedicated, and experienced core faculty and staff who collaborate to provide a first-rate educational experience for students.
- A knowledgeable clinical faculty of veterinarians and veterinary technicians who are dedicated to the training of veterinary technician students.
- Access to state-of-the-art laboratories and classrooms at the College of Veterinary Medicine; recent completion and use of the student skills laboratory with an extensive number of instructional models.
- Integration of the clinical phase of the Program into the clinical work conducted at the Veterinary Medical Center; exposure to a wide variety of clinical casework.
- Excellent modeling of the Veterinary Healthcare Team.
- Supportive administration.
- The veterinary technician students’ access to diverse and extensive undergraduate University courses to gain additional knowledge and experience in their areas of interest.
- Availability of first-rate library facilities and services.
- Exceptional VTNE results and an active program of assessment.
- Dedicated, focused, and responsible veterinary technician students.
